

Stonres – seamless, resilient, urethane floor systems that combine distinctive, free flowing design with function. Stonres floors can play a critical role in supporting infection control programs for the healthcare industry by providing hygienic, monolithic, easy-to-clean surfaces. You'll also find Stonres floors have outstanding acoustical efficiency, ergonomic comfort and are stain and wear resistant making them an ideal choice for universities, schools, retail and commercial spaces.

Stonres® RTZ

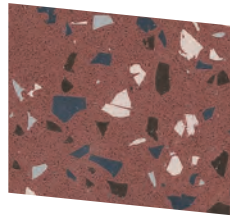

Ergonomic, noise-reducing and stain resistant floor for healthcare, education and commercial spaces. Highly recommended for ORs and surgical suites. Stonres gives planners and designers endless options in design, including free form designs and custom logos. It is easy to clean and extremely durable. Custom colors are available.

Stonres® STR

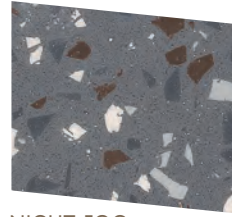

Ergonomic, noise-reducing, stain resistant and easy-to-clean floor in a solid, matte finish. Highly popular in hospital and school corridors, labs and research environments. Custom colors are available.
