

YOU BUILD THEM TO BE SAFE. WE GIVE YOU SAFE FLOORS TO BUILD THEM ON.

STONHARD MANUFACTURES & INSTALLS SMOOTH, SEAMLESS, CHEMICAL-RESISTANT FLOORS FOR THE AEROSPACE INDUSTRY.

Aircraft test areas, assembly lines, battery rooms, blast facilities, hangars and control rooms.

Stonhard formulates our floor systems to withstand impact, abrasion and chemical spills. Our floors are safe, designed for long-term performance and are easy to clean.

ESD formulations, custom colors, logos, textures and patterns, Stonhard has been installing seamless floors for the aerospace industry for nearly a century, meeting safety regulations and honoring specifications. Our direct sales force, along with Architectural/Engineering Team and Construction Management Group work with you from product recommendation to final work through.

Stonhard is committed to manufacturing and installing quality products and installations. Need references? We've got them, from large manufacturers and government facilities to private companies.

Contact Stonhard today and speak to one of our Territory Managers or Architectural/Engineering Representatives, www.stonhard.com, 800.257.7953.
